

# NOZZLE Klein

Art no 1201-1

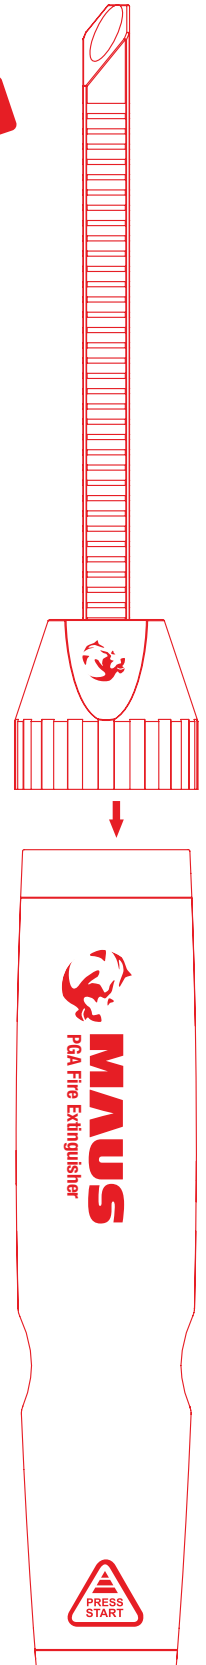

Extend the MAUS Xtin Klein with Nozzle Klein and stick it into the boat's Fire Port, under the hood of your vehicle, or in any other space where you don't want or have the ability to fully open a door, hatch or cabinet to extinguish a fire.

**Areas of use/professions:** Boat engines (specially designed for the Fire Port), motor vehicles (fires under the bonnet of a car, mobile homes, trucks, tractors, etc.), power stations, gas grills, etc.

**User instruction:**

1. Attach the nozzle to the upper part of the MAUS Xtin Klein.
2. Pull out the manual safety pin on MAUS Xtin Klein.
3. Insert the nozzle under the hood (vehicle), or in the Fire Port (boat) or in any other opening (cabinet/hatch/door).
4. Hold the device steady and press the Press Start button on the MAUS Xtin Klein.
5. Discharge the entire unit inside the space and be sure when you remove the MAUS Xtin Klein with the Nozzle Klein on top that the space is completely closed so that the potassium-based aerosol (smoke) remains in the space to extinguish the fire by absorbing the heat from the fire.

**SPECIFICATIONS:**

NOZZLE Klein:	Nozzle / Extension for MAUS Xtin Klein
Article Number:	1201-1
EAN / Barcode:	7350015530034
Dimensions:	L 247 mm ø 55 mm
